SAFETY TIPS FOR OPEN BURNING SEASON

Open Burning Season Begins on January 15th in communities where it is allowed. Check with your local fire warden or Fire Chief. The last day of burning is April 30th.

Permit Required from Local Fire Warden/Fire Chief:

A permit must be obtained from the local fire warden, usually the local Fire Chief.

Weather conditions can change rapidly, especially in the spring, and fire wardens will determine on a daily basis when it is safe to conduct open burning. If winds kick up or other atmospheric conditions change suddenly making it unsafe to burn, permits can be rescinded.

The open burning must be a minimum of 75 feet from all buildings and must be conducted between the hours of 10 a.m. and 4 p.m., and must take place on the land closest to the source of material to be burned, according to Department of Environmental Protection regulations (310 CMR DEP 7.07).

Burning, with a permit for the following materials is allowed:

- Brush, cane, driftwood, and forestry debris from other than commercial or industrial land clearing operations.
- Materials normally associated with the pursuit of agriculture such as fruit tree prunings, dead raspberry stalks, blueberry patches for pruning purposes, and infected bee hives for disease control.
- Trees and brush resulting from agricultural land clearing.
- Fungus infected elm wood, if no other acceptable means of disposal is available.

Burning of the following materials is prohibited statewide:

- Brush, trees, cane and driftwood from commercial and/or industrial land clearing operations.
- Grass, hay, leaves and stumps, and tires.
- Construction material and debris.

How to Safely Ignite the Fire:

An adult should always be present during open burning and children and pets should be kept a safe distance away.

Use paper and kindling to start the fire and add progressively larger pieces of wood. Parts of a leftover Christmas tree may also be used.
